Fax : 6553 5329

NUMBER: 20151117-0897

We wish to inform you that the Land Transport Authority (LTA) would have no objection to the display of stickers/ decals on private cars so long as the following requirements are met:

- a) no part of the stickers/ decals shall obstruct the view of the driver or pose any danger to other road users;
- b) the stickers/ decals do not cover or mask any lighting systems, number plates, windows, windscreens, and other pre-requisite markings/labels on the vehicle (speed limit, maximum passenger, company information etc);
- c) graphics and/or words shall not appear in any way pornographic, obscene or vulgar. They must also not be seditious or affront any religious belief;
- d) the basic colour of the vehicle must be maintained; and
- e) if the stickers/ decals are intended to be pasted across the windscreens and windows, they must not be more than 150mm (6 inches) measured from the top edge of the front windscreen and not more than 100mm (4 inches) measured from the top edge of the rear windscreen and side windows.

In addition, the resultant light transmittance for remaining areas of the front windscreen and both front windows must be at least 70%; and the rear windscreen and rear passenger windows must be at least 25%.

I hope the above information helps. Should you need any further clarifications, please do not hesitate to contact my colleagues, Mr Neo Aik Hing on \*number blocked\* or Mr Han Hang Kwang on \*number blocked\*.

We thank you for writing in.

Yours sincerely

Cedric See Wee Thai  
Senior Engineer, Vehicle Engineering  
Land Transport Authority
